# Ready for the next adventure?

## We are looking for enthusiastic Veterinary Nurses in various departments!

Hofheim Small Animal Hospital is one of Europe's largest referral clinics for small animals. More than 90 veterinarians, 85 Veterinary Nurses and 25 trainees work here on the highest medical level and with outstanding medical equipment. We are a professional, passionate, open-minded and dedicated team and are looking for YOU!

### What we offer:

- an extensive introductory and training programme – no special experience and abilities required
- regular continuous education: free internal CPD, funded external CPD
- personal and professional development is encouraged and supported
- an attractive salary above tariff
- reliable health insurance
- a large, professional, international and cheerful team
- we will support you in your efforts to learn German by paying for your language courses
- benefits: generous annual leave, family friendly policies including m/paternity leave/pay, cycle to work scheme, funded gym membership and funded lunch

### What we are looking for:

- motivated and enthusiastic qualified Veterinary Nurses to join our social and friendly team
- the ideal candidate has a great work ethic and passion for consistent high level patient care
- a completed apprenticeship as a Veterinary Nurse – with or without work experience
- permanent team-players full- and part-time, with some out of hours work
- an interest in mentoring others
- the willingness to quickly become fluent in German

### Our daily work...

#### Team out-patients:

We support our vets in the departments internal medicine, cardiology, oncology, radiation therapy, neurology, orthopaedics, dermatology, ophthalmology, ear-nose-throat and in our busy emergency service. We coordinate a smooth flow of our consultation hours and actively take part in all necessary examinations and treatments.

#### Team in-patients:

We care for our in patients in the dog, cat, small animal, ICU and isolation ward. Interesting medical and nursing tasks are waiting for you.

#### Team diagnostic imaging:

CT and MRI scans are carried out by our Veterinary Nurses. General anaesthesia and preparation work are also part of the job.

#### Team surgery:

Our surgeons cover all kinds of cases: soft tissue and orthopaedics, ear-nose-throat, neurology, ophthalmology, oncology, laparoscopy, and thoracoscopy. We conduct out the preparation for the patient and surgery, perform anaesthesia and coordinate all necessary procedures.

#### Team radiation therapy:

Our linear accelerator is used for radiation of tumor patients. We carry out the treatments and all daily routines linked to the machine.

## More possibilities to work with us:

**team night emergencies | team medical laboratory | team week-ends**
